

# MHW Aluminium Hand Winch

### Description

The MHW Aluminium hand winch is designed for deck storing of cables up to 25 mm diameter. The winch frame is constructed from welded high grade corrosion resistant aluminium with Delrin® bearings for minimal weight.

### Features and benefits

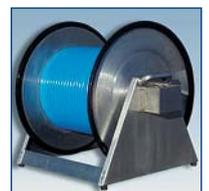

- Portable and rugged
- Low maintenance
- Aluminium construction for marine environments
- Mechanical parking brake
- Delrin® bearings
- Up to 1000 m of 9 mm diameter cable (200 m of 20 mm diameter)
- Designed for Focal model 180 electrical/electro-optical slip ring

### Applications

- Low cost ROV systems
- Underwater TV systems
- Oceanographic instrumentation
- Diver communication lines
- General marine instrumentation

### Options

- Castors with brakes
- Cable sheave and status indicator system
- Electrical drive

# Technical Specifications

## Specifications

Material : ALMg 3,0 aluminium  
Construction : Welded frame and flanges  
Bearings : Delrin® bearings  
Brakes : Mechanical parking brake  
Dimensions: H – 720 mm  
W – 780 mm (max)  
D – 700 mm

Maximum static load : 75 kg  
Weight : 22 kg
