

# MHW Stainless Steel Hand Winch

### Description

The MHW stainless steel hand winch is designed for deck storing of cables up to 25 mm diameter. The winch frame is constructed from stainless steel with an electro-polish finish. The drum is manufactured in a specially formulated plastic material making the whole unit resistant to corrosion and at the same time requiring little maintenance.

### Features and benefits

- Portable, rugged and corrosion resistant
- Low maintenance
- Stainless steel and special plastic material for ocean environments
- Mechanical parking brake
- Sealed roller bearings
- Up to 1700 m of 9 mm diameter cable (350 m of 20 mm diameter)
- Designed for Focal model 180 electrical/electro-optical slip ring

### Applications

- Low cost ROV systems
- Underwater TV systems
- Oceanographic instrumentation
- Diver communication lines
- General marine instrumentation

### Options

- Castors with brakes
- Cable sheave and status indicator system
- Electrical drive

# Technical Specifications

## Specifications

Material : AISI 304 stainless steel  
Construction : Welded frame and flanges with special plastic drum  
Bearings : sealed roller bearings  
Brakes : Mechanical parking brake  
Dimensions: H – 865 mm  
W – 800 mm (max)  
D – 800 mm  
Maximum static load : 250 kg  
Weight : 43 kg
