

# MASH ROV Winch 550/29-15 kN

## Description

The MASH 550/29-15 ROV winch is designed for 550 m of 29 mm diameter cable. It is used extensively in connection with trunkers and ROV systems.

Features include an incorporated protection frame, direct drive level wind, variable speed, fail safe brake, built in motor controller and IP56 protection of electrical parts.

All units are prepared for Focal slip rings and have fork lift slots and pad eyes for lifting.

## Features and benefits

- High speed
- Compact design for integration with modern single beam overboard systems.
- Primarily designed for the SeaOwl ROV system, but can be used for other purposes

## Applications

- Small to medium sized inspection and work ROV's

## System options

- Wireless remote
- Touch screen remote control station
- Customer designed machine interface
- Active heave compensation
- Constant tension without signal from load cell
- Control of winch by other customer signals i.e depth sensors etc.

These are just examples of the options available
