## AnchorZip 10 ROV Suction Anchor Pump

The AnchorZip 10 incorporates many advances developed from several years of producing Tritech's industry standard range of ROV mounted jetting and excavation systems.

Specifically designed for ROV deployment, the AnchorZip 10 will interface with most work vehicle hydraulic systems. Vehicles fitted with the AnchorZip 10 will offer a very quick and cost effective way of installing and removing suction anchors. Output pressures may be regulated to ensure that differential pressures remain within the structural limits of all types of suction anchor.

Flow reversal for anchor recovery is achieved simply by sliding the motor and top assembly from the input to the output side of the centrifugal pump.

### Safe and reliable suction anchor installation and removal

The Tritech AnchorZip 10 is a unique product which has been developed using the highly successful ZipPump and ZipJet technologies. The AnchorZip 10 is a heavy duty suction anchor pump designed for work-class vehicles able to produce 25hp of hydraulic power.

#### **Benefits**

- High efficiency
- High performance
- Easily interfaced
- Proven ZipJet technology
- Worldwide support

#### **Features**

- Flow reversal for anchor recovery
- Variable suction release valve preset
- Durable moving body design

#### Applications

- Deploy/recover large suction anchors
- Work-class ROV mounting

# Specification

4 off M16 x 2

Not to scale, dimensions in mm.

Hydraulic Motor Input	
Pressure	276 Bar (4000 psi)
Flow	70 litres per minute (15 USgpm)
Actuator	
Minimum pressure	70 Bar (1000 psi)
Maximum pressure	240 Bar (3480 psi)
Hydraulic Fittings	
Motor A & B	No. 12 JIC male
Motor case drain	No. 6 JIC male
Actuator connection	No. 4 JIC male
Output	
Typical differential pressure	Up to 9.5 Bar (140 psi)
Typical differential pressure Typical suction flow	Up to 9.5 Bar (140 psi) Up to 80 cubic metres per hour at 7.5 Bar
Typical suction flow	
Typical suction flow Nozzle and Hose Dimensions	Up to 80 cubic metres per hour at 7.5 Bar
Typical suction flow         Nozzle and Hose Dimensions         Anchor port connection	Up to 80 cubic metres per hour at 7.5 Bar Square flange with 72mm port
Typical suction flow           Nozzle and Hose Dimensions           Anchor port connection           Minimum hose diameter	Up to 80 cubic metres per hour at 7.5 Bar Square flange with 72mm port
Typical suction flow         Nozzle and Hose Dimensions         Anchor port connection         Minimum hose diameter         Weight and Materials	Up to 80 cubic metres per hour at 7.5 Bar Square flange with 72mm port 72mm (2.8")
