

OCEANTOOLS

Innovative Products & Solutions for use in some of the world's harshest environments

OceanTools Offshore Operations: Leak Detection Surveys

OceanTools offer a specialised Leak Detection Survey to assist oil-companies detect leaks from subsea infrastructure.

The service uses the highly-regarded OceanTools OceanSENSE ROV deployed or Diver Held Leak Detection System along with OceanTools Leak Detection Engineers.

OceanTools Leak Detection Engineers have performed numerous offshore leak detection surveys for oil companies and have achieved a 100% success record at finding the leak.

The OceanSENSE leak detection units can detect Fluoresceins, Rhodamines or certain Hydrocarbons.

Please contact us for more information.

KEY FEATURES

Survey uses well-proven OceanSENSE Leak Detection System

ROV mounted or Diver-held variants

Highly trained Leak Detection Engineers

Many successful surveys carried out

Detection of Fluorescein, Rhodamine or Hydrocarbons
